

Heartbase Aligns with Biome Analytics to Deliver a New Generation of Analytic Applications that Help CV Centers Drive Superior Outcomes and Lower Costs

Sausalito, CA and Chicago, IL — March 29th, 2018 — Heartbase, Inc., the premier database for cardiovascular registries, has partnered with clinical performance innovator Biome Analytics to deliver a new generation of analytic applications that help cardiovascular centers drive superior outcomes and lower costs. This new initiative will provide hospitals and cardiovascular clinicians with unprecedented insight into their clinical and financial performance, help them focus on the opportunities with the greatest impact, and accelerate improvement in their hospital or network. Working together, heartbase and Biome will provide precision insights and data that cardiovascular centers need to align teams and profitably deliver superior care, and in the coming weeks, this combined solution will be made available to existing and prospective clients of both heartbase and Biome.

“We are always looking for ways to enhance the services we deliver to our clients,” said Stephen Gawrit, Director of Sales and Operations at heartbase, Inc. “Biome’s analytic offerings expand our growing portfolio to support key registry developments, including advanced clinical-financial TVT-TAVR reporting.”

In the ever-changing landscape of health care, it has become increasingly important for hospitals to be able to use their historical data in order to create more cost-effective methods of providing superior care. Together, heartbase and Biome provide a joint solution that will align physicians and hospital networks with the trusted data and cutting-edge analytics they need to strengthen their research and propel them to the top of national rankings.

“Biome is pleased to announce this innovative partnership with heartbase. Helping hospitals and doctors work together to improve quality and reduce cost is at the core of our mission” said Stuart Jacobson, President & CEO of Biome. “Together we will help doctors, heart centers, and health systems deliver superior clinical and financial performance. This is another first for Biome as we continue on our mission to help care teams deliver better care to more patients at a lower cost.”

About heartbase, Inc.

Since 1992, heartbase™ has provided healthcare centers with the most technologically innovative and clinically intuitive data management and registry reporting solution in the industry. Working collegially with its immense network of users, heartbase™ has developed an extensive library of reporting tools that provides clients with complete control of their hospital-owned clinical data. Heartbase’s revolutionary hbCOR platform propels clinical performance, aligns clinical data with registry requirements, and unites health care systems from across our network with access to the most comprehensive reporting repository in the industry.

About Biome Analytics

Biome was founded in 2014 with the simple mission of leveraging precision data, advanced analytic technology and the best insight of leading clinical teams to help doctors and hospitals deliver the best possible cardiovascular care, to more patients, at a lower cost. Our machine-driven algorithms, human-enabled analytic applications have helped leading hospitals, health systems, and cardiovascular teams achieve clinical and financial outcomes that place them at the top of national rankings.
